

2026: Year of the DevOp

The supercharged developer

- Ask questions about a codebase
- Autocomplete multiple lines at once
- Write a method from scratch.

- 90% of code written at Anthropic is by Claude
- 4% of commits on GitHub are authored by Claude (0.3% in October)

Claude is **not** proactive

1. Context
2. Verification

Context

1. Anthropic system prompt
2. Claude.md
3. Claude's "memory" in `/.claude`
4. Your prompt
5. Things Claude looks up itself
 - Source files
 - Documentation
 - CLI tools (e.g., Grep, Maven, GitHub CLI)
 - MCP (e.g., Google search)
6. Agent Skills (aka. slash commands)
7. Current session's conversation history
8. Sub-agent output

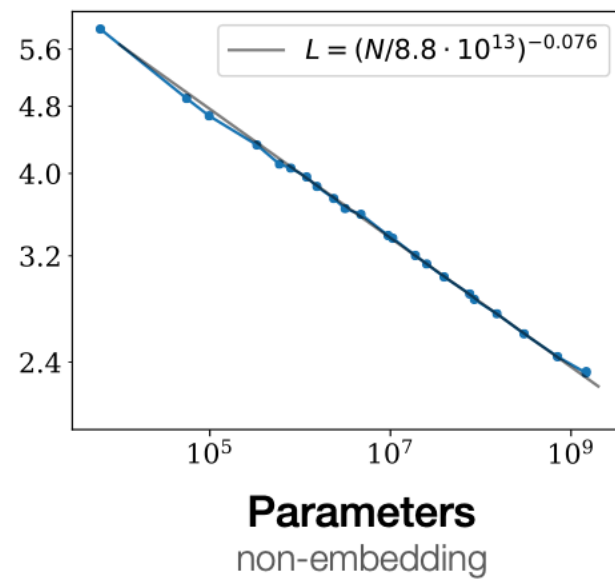

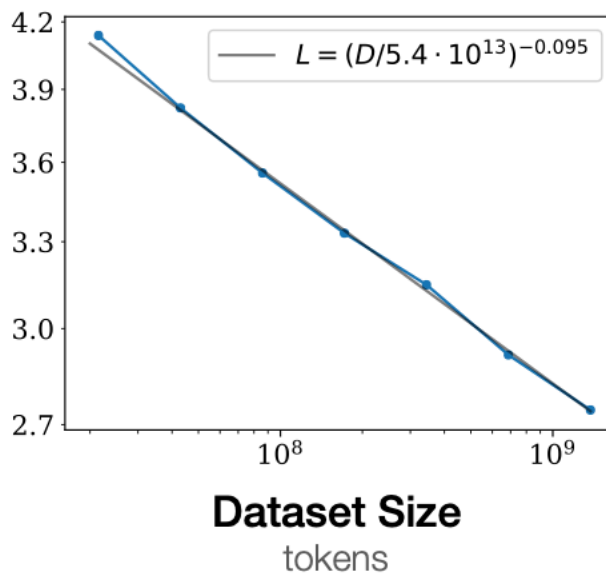

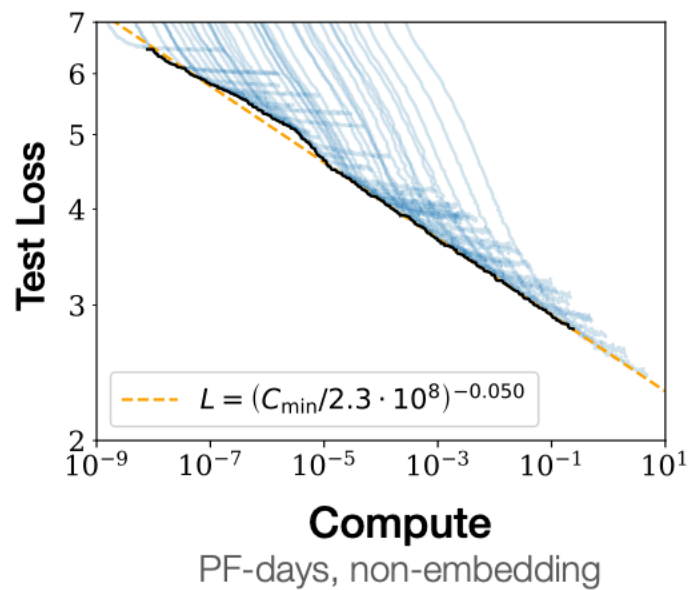

Verification

1. Compile/Build script
2. Unit Tests
3. Browser MCP

Workflow

- GitHub issues
- “Ticket” skill
- Parallel agents via. Git worktrees
- Visual/audio notifications

Demo

Time horizon of software tasks different LLMs can complete 80% of the time
